

ARTIST'S STATEMENT

Painting is my joy! My absolute bliss! I work non-objectively, experimentally, and intuitively, searching on the canvas or paper for the beauty I know will be there. I have diligently studied many facets of painting and am constantly learning more. Understanding the technical aspects of the art, I allow my intuition to work, along with my imagination, towards dynamic design with much experimentation. Texture, line, form, and the interesting arrangements of shapes, along with the use of color, make my statement.

I believe art should be an enriching part of every person's life, and should be a mental and emotionally stimulating experience for both the artist and the observer. I want to share the joy and excitement painting brings to me as an artist by showing the viewer a different way of experiencing the world around us. If I can evoke strong feelings of emotion and understanding in the viewer, and a new way of seeing our world, my work is a success.

- Sintha Anderson
